ABSTRACT:

PROBLEM TO BE SOLVED: To extract an information properly showing features of the work of a worker by analyzing the record of work that the person did.

SOLUTION: A document managing means 1 manages documents regarding work by adding information on a preparer. A document feature extracting means 2 extracts documents prepared by one worker from the document managing means 1 and extracts features of the respective documents. A work feature extracting means 3 extracts features of the work of the worker by finding out overlapping features of the documents to generate a work feature management table 4. In the work feature management table 4, features are registered which are common to documents that one person in charge prepared. Works that respective people in charge are doing can accurately be judged by referring to a work feature management table 4 like this.
